WORK EXPERIENCE

Pocket FM

Aug 2026 – Present

SDE 2 · Audio Streaming Tech

Bengaluru, India

- Independently engineered the complete **Store Revamp V2** featuring fluid, 120Hz ProMotion animations; integrated coin purchasing via **Apple StoreKit 2**, **Juspay payment gateway**, and rewarded ad unlock flows.
- Spearheaded performance optimization and **hang detection**; profiled and sanitized multi-threaded execution across GCD queues, resolving UI stalls, reducing crash rates to 0.1%, and sustaining **99.9% crash-free sessions**.
- Architected the **Notification & Tracking Permission revamp**, capturing critical telemetry and real-time crash diagnostics for data-driven reliability; led iOS implementation for **Profile Revamp V2** with dual OTP verification.

Navi

May 2025 – Aug 2026

SDE 2 · Fintech Scale

Bengaluru, India

- Improved application scalability by migrating lifecycle management to SceneDelegate architecture.
- Enabled deep-linking and faster content discovery by integrating CoreSpotlight-based search indexing.
- Enhanced modularity and testability by implementing dependency injection using Swinject and SPM modules.

MakeMyTrip

Jan 2024 – May 2025

Senior Software Engineer (SDE-2)

Bengaluru, India

- Engineered high-conversion travel features including Zero Cancellation, Free Date Change Insurance, and advanced Filters using SwiftUI.
- Accelerated cross-team feature integration by developing the Unified Flights SDK using SPM and CocoaPods; led iOS pod architecture.

Nuclei

May 2021 – Dec 2023

iOS Developer (SDE-1)

Bengaluru, India

- Delivered core banking features including Fund Transfer, Scan & Pay, and onboarding, improving mobile banking usability.
- Achieved regulatory compliance by integrating UPI using NPCI CL Library and successfully completing certification.
- Optimized CoreData migrations and background queue QoS synchronization, boosting persistence performance.

FEATURED PROJECTS

Courier City — 3D Browser Simulation & Open World

2026

Three.js, Cannon-ES Physics, Vite & Vanilla JS · [Live Game](#) · [GitHub](#)

- Engineered a GTA-style 3D open-world procedural browser game across 3,600+ lines of procedural rendering without external 3D asset files.
- Implemented real-time rigid-body vehicle dynamics, collision meshes, multi-tier Silk Board flyover interchange, and Bangalore landmarks.

RebelRoutes India (Rebel Roots) — Anti-Gridlock Transit Engine

2026

FastAPI (Python) Backend, Vite/React Frontend · Hosted on Vercel & Render · [Live App](#) · [GitHub](#)

- Built a zero-cost multimodal urban transit engine pairing pedestrian walking bypasses with suburban rail, metro skybridges, and campus back-gates to circumvent major Indian traffic choke points (Silk Board, Hinjawadi, WEH).
- Deployed serverless backend on Render/Vercel with OSRM engine and Photon OSM geocoding with dynamic time-of-day traffic heuristics.

Open Source Core Contributions (Google, Apple & AppLovin SDKs)

2026

Active Contributor · Swift, Go, Java/Kotlin, C++ · github.com/shubhrransh-gupta

- Google:** Contributed to `google/osv-scanner` (#3049, #3088) resolving vulnerability checklist filter state retention and dependency graph UX.
- Apple:** Merged PRs in `apple/swift-argument-parser` (#961), `apple/swift-protobuf` (#2159), and `ml-explore/mlx-swift` (#467, #481).
- AppLovin SDKs:** Authored fixes across `AppLovin-MAX-React-Native` (#488, #487 - adapter view sizing & lifecycle), `AppLovin-MAX-Flutter` (#366 - compileSdk 36), and `AppLovin-MAX-Unity-Plugin` (#620).

EDUCATION & SKILLS

BNM Institute of Technology

Aug 2017 – Jun 2021

B.E. Computer Science | GPA: 8.45/10 | Ranked #1 College-Wide on GeeksForGeeks

Bengaluru, India

- Languages & Core:** Swift 6.0, SwiftUI, UIKit, CoreData, StoreKit 2, Structured Concurrency, Actors, Python, TypeScript, Three.js, C++
- Tools & Infrastructure:** Xcode, Instruments, SPM, Fastlane, Juspay, Crashlytics, AppLovin MAX, Docker, Git, CI/CD, Vercel
